

VASCO DA GAMA COLAB
INNOVATION FOR A BETTER WORLD

BMS Engineer Research Position

VG CoLAB is hiring a researcher with experience in battery management systems and/or prototyping to participate in the development of new, sustainable batteries and battery systems. VG CoLAB is a non-profit research institution dedicated to the transformation of novel research into commercial and industrial applications. The focus areas of VG CoLAB include sodium batteries, supercapacitors, redox flow batteries, alternative battery chemistries, power management systems and energy storage systems.

Expectations:

- MSc in electrical engineering or related fields;
- Experience in the development of state estimation for battery management systems preferred;
- Modeling experience required;
- Independent and motivated researcher capable of meeting challenges;
- High level writing skills;
- Fluent in Portuguese and English.

Location:

PORTIC, Rua Arquiteto Lobão Vital N°172 4200-374 Porto

Applications should be sent to: info@vgcolab.com, and include:

- Motivation letter
- *Curriculum vitae*
- Copy of Masters diploma
